

Resume

Name: Pallerla Srinath

Email: srinathpallerla007@gmail.com **Mobile**

No: +91-9441118996

Objective:

Looking forward for a challenging work profile in Software Development field. My key interests are working on new cutting-edge technologies, learning new tools, working on new innovative design frameworks and making the overall Software Development process optimized and efficient one.

Experience Details:

- Working with Digital-Nirvana Information System Private Limited Since March 2022 to Till Date.

Summary:

- Having overall 1.9+ years of work experience in IT sector.
- Having 1.9 years of relevant experience in application development using Frontend and Backend technologies.
- Good working Knowledge on frontend and backend technologies **Angular 12+, Node JS, JavaScript, Html5, CSS3, and Bootstrap.**
- Had a real time experience in working with **AWS Technologies like Lambda, API gateway, DynamoDB, Cognito, S3, SES, MongoDB, Express Js, and serverless Framework.**
- Good Knowledge on Dependency injection and two-way data binding.
- Good Knowledge and developing **REST API's** using node Js.
- Had real time experience in working on **CRUD** operation with **DynamoDB.**
- Used Http services & pagination.
- Good amount of work done on **Reactive forms.**
- Single page application development as using angular Routes.

- Created custom directives & custom pipes for re-usable components.
- Developed Rest API's in backend using Node JS Technology.
- Written Unit test cases for Node Js API's using Jest JS
- Developed an **OTP VERIFICATION API** using **AWS SES** in **Node Js** Technology.
- Worked on Agile Methodology to improve project management and collaboration.
- Collaborated with cross-functional teams to deliver projects on time and within scope.
- Participated in daily stand-up meetings, sprint planning, and retrospectives to ensure efficient project execution.

Tools and Technologies:

Web technologies : Html5, CSS3, Bootstrap 4.
 Scripting Language : JavaScript
 UI Frameworks : Angular 12+
 Backend : Node JS, Express
 Database : DynamoDB, MongoDB
 Cloud : AWS
 IDE : Visual Studio.
 Version Control : GIT.

My Demo Projects:

<https://github.com/Srinathpallerla9999?tab=repositories>

Professional Experience:

Project 1 : Alphastreet Intelligence (ASAI)
 Role : Front End Developer
 Technologies : Angular 14, JavaScript, ES6, HTML5, CSS3.

Description:

Alphastreet Intelligence (ASAI) is a subscription platform. It will provide financial data like transcripts, Earnings events, SEC documents. A web application is being developed for them in Angular with provisions for investors and analyst to one place.

Website: <https://www.alphastreet.com/>

Roles & Responsibilities:

- Developed and used various angular components and directives as per requirements.
- Consuming the **REST Api's** and displaying the data on view pages.
- Worked on **lazy loading & Reactive forms**.
- Added restrictions on the content as per subscriptions.
- Used routing mechanism as per required modules.
- Developed various user screens using **HTML, JavaScript, CSS** and **Bootstrap** as per requirements.
- Developed the user screens with **JavaScript DOM Manipulation**.
- Used **Gitlab** for application code repository.
- Worked on **lazy loading & Reactive forms**.

Project 2 : Investment Research system

Role : Frontend Developer and Backend Developer

Technologies : Angular13+, Node JS, JavaScript, HTML5, CSS3, ES6, AWS, DynamoDB, MongoDB, express JS, and serverless.

Description:

Investment Research system

This project includes seven different applications/services. The system fetch the financial event details and record the conference calls based on the recording details. The recorded audio will automatically convert to the text and it will be further edited and processed from the transcription system.

Roles & Responsibilities:

- Developed the User Interactive web pages in a professional manner using web technologies like HTML5 and CSS3 based on the W3C standards.
- Worked in a team, involved in developing the UI, layout and front-end program. Developed various user screens using **HTML, JavaScript, CSS** and **Bootstrap** as per requirements
- Worked on **lazy loading & Reactive forms**.
- Implemented role-based access controls, ensuring that only authorized users can view and manage recordings.
- Integrated **web socket** to display the live Calls in frontend.
- Restricting some page access to Managers and TLs only.
- Added strict validations while doing **CRUD operations** in both **Angular** and **Node JS**.
- Developed OTP verification system to confirm the user is valid or not by using **Node Js** for Backend and **Angular** for Frontend.
- Added groups for users to restrict the pages and function using Technologies **Node JS** for Backend and **Angular** for Frontend.
- Deployed all the developed code in AWS Cloud using serverless.
- Developed API's using **Node JS, DynamoDB, AWS Lambda, SES, API Gateway, MongoDB, Express JS** and **Serverless**.
- Developed ng – charts graph to display the data as per required in UI Page.
- Added Jest JS NPM unit test cases for Backend API's which developed in Node Js.
- Used **Gitlab** for application code repository.

Educational Qualification:

- Completed my Graduation in B. Sc(M. P. Cs) from Satavahana University, Karimnagar

DECLARATION

I hereby declare that the details and information given above are true according to the best of my knowledge
